

IN THE SPECIFICATION:

Please further amend the paragraph that was amended in the Amendment filed on June 27, 2003, at page 16, lines 7-12 of the specification, to read as follows:

--When the polymer film 4 is formed by the ink jet system, the solution of polymer material is applied as liquid droplets and then is dried into a solid state polymer film. If necessary, the solution of a desired precursor polymer may be applied as liquid droplets and then be polymerized by heating.--
